

Business Plan: HealthCare Management System Startup

Executive Summary

HealthCare Management System (HMS) is a cloud-based platform for clinics and hospitals in Rwanda. It manages patient records, appointments, billing, pharmacy, laboratory, inventory and reporting. Funding requested: **100,000,000 RWF**.

Problem: Many facilities rely on paper records causing delays and errors.

Solution: Secure digital HMS with web and mobile access.

Target Customers: Clinics, health centers, hospitals, NGOs.

Revenue: Subscription, setup fees, support, training.

Marketing: Direct sales, partnerships, demonstrations, digital marketing.

Operations: Product development, deployment, customer support, maintenance.

Risk: Adoption, cybersecurity, regulation. Mitigation: training, backups, encryption, compliance.

Funding Use: Product development, infrastructure, staff, marketing, legal/compliance, contingency.
